PROFILE

I design and build web products, mobile tools, and the services behind them for teams in Accra and for remote clients who want the work to stay clear after launch. Most of the work is TypeScript: React, Next.js, and Node.

EXPERIENCE

Independent software engineer, Pixel Craft, Accra - 2023 to present
Product design and engineering for Ghanaian businesses and remote teams, including retail checkout, inventory, and operational tools.

Product engineer, Gold Coast Digital, Airport City - 2021 to 2023
Led the web checkout used by three retail clients and sat with shop staff while they tried it.

Junior developer, Volta Systems, Accra - 2019 to 2021
Internal tools and a customer portal. Learned to write the note that explains a change before the change itself.

EDUCATION

BSc Computer Science, University of Ghana, Legon - 2015 to 2019

SELECTED WORK

Makola Stockroom - Next.js, TypeScript, PostgreSQL - 2025
Tablet inventory for a wholesale cloth and provisions shop in Makola.

Cedis Checkout - React Native, TypeScript, Node.js - 2024
Shop-counter checkout for MTN MoMo and Telecel Cash.

CampusRoute - Next.js, Node.js - 2024
Evening shuttle positions for the University of Ghana.

Harbour Desk - Next.js, TypeScript, PostgreSQL - 2023
Shipment status for a freight desk at Tema Port.

SKILLS

TypeScript, React, Next.js, Node.js, PostgreSQL, React Native, interface design, testing, and deployment.
